

Appl. No. 10/065,782  
Amdt. dated July 10, 2006  
Reply to Office action of May 16, 2006

**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

- 1 (currently amended): A method of providing device-dependent print data to a printer by
- 5 a computer system, the computer system comprising:  
an operating system having an upper layer for controlling a graphical device  
interface, and a lower layer for controlling input/output activities;  
the method comprising:  
providing a printer manager for generating [[the]] print data, the printer manager
- 10 comprising a device-dependent converter for converting input data into  
device-dependent output data;  
providing encoded data to the printer manager;  
the printer manager decoding the encoded data to generate raw data, and utilizing  
the converter to convert the raw data into the device-dependent print data
- 15 without utilizing the upper layer;  
providing the device-dependent print data to the lower layer; and  
the lower layer of the operating system outputting the device-dependent print data to  
the printer.
- 20 2 (original): The method of claim 1 wherein the converter converts the raw data into  
gray-level image data and converts the gray-level image data into the  
device-dependent print data.
- 3 (original): The method of claim 1 wherein the converter converts the raw data into
- 25 cyan-magenta-yellow-black (CMYK) image data and converts the CMYK image  
data into the device-dependent print data.

Appl. No. 10/065,782

4 (original): The method of claim 1 wherein the printer manager further comprises a user interface for configuring the printer manager, wherein the converter converts the raw data into the device-dependent print data according to configuration information of the user interface.

5

5 (cancelled).

6 (original): The method of claim 1 wherein the encoded data is stored in a joint photographic experts group (JPEG) format.

10

7 (original): The method of claim 1 wherein the encoded data is stored in a graphics interchange format (GIF).

8 (original): The method of claim 1 wherein the encoded data is stored in a bitmap (BMP) format.

15

9 (original): The method of claim 1 wherein the encoded data is stored in a tag image file format (TIFF).
